

Since 2011, KKR has deployed more than \$4.7 billion of total equity into renewable assets such as solar and wind, which have a power generation capacity of 12.5 GW, as of December 31, 2020. These renewable investments, including district heating assets, have a combined enterprise value exceeding \$19.5 billion. As of April 2021, KKR was the ninth largest owner of solar assets in the U.S.
