

## Global Medical Response: Answering the Call During Emergencies\*

Emergencies, accidents, and natural disasters happen. When crises do occur, Global Medical Response (“GMR”), a leading medical transportation company, is there to provide immediate high-quality medical assistance and transportation services. GMR is an integrated solutions provider, serving more than 4,000 communities around the world, including 40 U.S. states and the District of Columbia. It utilizes its fleet of more than 7,000 ground vehicles, 110 fire vehicles, and 410 aircraft to serve them. GMR performed a critical intervention every 10 minutes in 2018, with its team of 38,000 qualified clinicians and support personnel transporting more than 13 million patients.

At a moment’s notice, GMR’s fleet and patient care providers can be deployed to assist in natural disaster response. In 2018, GMR’s team did just that during the Kauai, Hawaii flooding, the California wildfires, and Hurricane Michael in the United States, as well as the Trinidad and Tobago earthquake.

\* The case study about the company from the private equity portfolio shown above represents what we believe to be the most demonstrative example of a portfolio company providing emergency response services in 2018 as identified by the Global Public Affairs team. The specific portfolio company identified is not representative of all of the investments made, sold, or recommended to advisory clients, and it should not be assumed that the investment in the company identified was or will be profitable. All information and data are as of December 31, 2018, unless otherwise noted.
